

June 16, 2026

Dear Mr. Nayak:

The AAALAC International Council on Accreditation has reviewed the April 12, 2026, November 12 and October 27, 2025 correspondence pertaining to AAL Biosciences Research Private Limited, Panchkula, Haryana, India. The Council is pleased to inform you that the deficiencies regarding euthanasia methods for rodents; animal vendor qualification assessment process and procedures for the sick animals; single housing of rabbits; and temperature fluctuations of the heating, ventilation and air conditioning system noted in its February 13, 2026 correspondence have been corrected satisfactorily in accordance with the AAALAC International Rules of Accreditation. Therefore, **FULL ACCREDITATION** is awarded. The Council recognizes your efforts to achieve a quality animal care and use program and commends you and the staff for the positive actions taken.

AAALAC International requires an Annual Report that describes any changes made during the year in accredited units. Submitting this report is required to maintain accreditation. In the meantime, AAALAC International should be promptly informed of any significant program changes or adverse events. Guidance on these reporting requirements may be found at aaalac.org. If requested, AAALAC International can also provide a separate letter confirming that your animal care and use program is accredited.

Should you have any questions regarding your participation in the AAALAC International accreditation program, please feel free to contact the staff at the Executive Office.

Sincerely,

A handwritten signature in black ink, appearing to read "David G. Schabdach".

David G. Schabdach, D.V.M., M.S.
President, Council on Accreditation
